

REMARKS

In response to the election requirement in the Office Action of September 24, 2008, Applicant hereby elects Group 3, claims 5, 7, 17, and 18, drawn to a light-emitting element.

Claims 5, 7, and 18 have been amended to correct informalities therein. The correction to claim 5, i.e. changing "electron acceptability" to "electron-donating property" is supported in the present specification, for example, by page 16, line 28, to page 17, line 1.

New dependent claims 19-23, which also read on the elected invention, have been added. Claims 19 and 20 are supported in the present specification, for example, by page 17, line 21, to page 18, line 13. Claim 21 is supported in the present specification, for example, by page 12, lines 2-8. Claim 22 is supported in the present specification, for example, by page 16, line 28, to page 17, line 9. Claim 23 is supported in the present specification, for example, by Figure 1, where the first, second and third layers may correspond to references 111, 113 and 115, respectively, in Figure 1.

Thus, claims 5, 7, and 17-23 are subject to examination at this time.

Examination on the merits is requested.

Respectfully submitted,

Eric J. Robinson
